Jeff Gordon Endorses PurigeN98™— Safety and Environmental Friendliness Touted

NASCAR superstar Jeff Gordon won't compromise passenger car safety for performance, that is why he supports PurigeN98™, a high purity nitrogen tire inflation gas that stabilizes tire pressure and reduces its pressure loss.

"I have used high purity nitrogen in my race car tires for years and while winning is great, nothing is more important to me than the safety of my family," Gordon said. "PurigeN98™ gives me that extra peace of mind, that's why I am putting PurigeN98™ in my personal vehicles."

Gordon uses PurigeN98™ in his cars, and now this superior product is also available to consumers. Although performance and safety are important to all motorists, increasingly so is the impact of automobiles on the environment.

According to the US Department of Energy, Americans waste 10 million gallons of fuel every day because of driving on under-inflated tires. Annually, this equals 3.6 billion gallons of fuel wasted and 77 billion pounds of greenhouse gases needlessly dispersed. The use of PurigeN98 will significantly reduce this impact.

"Our country needs to be made aware of the significant benefits that PurigeN98™ offers to all motorists, and we are extremely excited that Mr. Gordon has joined our effort," said Robin Pearl, president of PurigeN98™.

PurigeN98™ is available at better car dealers, tire stores and auto service facilities nationwide. Only PurigeN98™ dealers are authorized to use the trademarked blue caps to show that tires have been inflated with PurigeN98. Mr. Gordon and PurigeN98™ are committed to help America's driving public reduce fuel consumption, save energy, increase safety and help reduce greenhouse gas emission.

About PurigeN98™:

N2Revolution, Inc, based in Sunrise, Florida., develops and manufactures leading-edge automotive solutions, its flagship product being PurigeN98™. N2Revolution recently received the Emerald Award from Broward County in the Innovative Procedures/Process Improvement category and has been featured on MSNBC and in a number of broadcast and print media nationwide. Led by a team of distinguished veterans from the automotive, environmental, financial, engineering and scientific industries, the company is committed to developing high-quality, affordable and environmentally friendly innovations that enhance the quality of life of today's sophisticated consumer.
