

At a time when you need it the most Jack Ingram Nissan Delivers. This is a message that Nissan USA is sending out and it is a message that we are sending to all of our valued customers. We want you to know that we are here for you and we will continue to be here for you no matter what the current economic situation is.

We understand that buying a new automobile right now might not be in your current plans but if it please believe that we are here for you and we will continue giving you great prices that will insure your savings in the long run. If you are not considering purchasing a new vehicle you should consider updating the maintenance on your current vehicle. A well maintained automobile will save you money in the long run and help extend the life of it.

Our service technicians are the best in the business, they can do any kind of maintenance on your vehicle and they can do it quicker than most which will result in saving you money on labor expense. We have some great service specials going on and they are all designed to help extend the life of your vehicle and we know how important it is for your vehicle to support your needs every day.

Tires are a big expense and usually they are needed at the worst possible time. The fall and winter is amongst us and with the temperature change you will probably encounter a change in your tire pressure. If you don't catch it soon enough you will damage your tires and it could result in a costly repair. We just invested in a **Nitrogen Tire Inflation System**. It has been a wonderful solution to many tire problems for customers, number one being tire inflation or should I say deflation. Nitrogen does not react to temperatures the way air does and therefore when your tire is inflated with Nitrogen it will stay inflated for at least a year unless punctured or damaged. Keeping them inflated will also keep your tires from wearing abnormally and it should also help your fuel economy. There are a few Nitro stations in Alabama and they are charging as much as \$69.95 to fill all 4 tires, we are going to offer the same service for \$34.95 to help save you money. It only takes about twenty minutes or so to perform the service and most of the time you don't need an appointment. While the process is being completed we will also do a visual inspection of your brakes, rotors and tires at no charge to make sure your vehicle is safe for the winter. We will also re-inspect and refill Nitrogen one year later if necessary for free.

I also want to personally Thank You for your loyalty towards us and I hope our relationship will continue for many years to come. Please have a Safe and Happy Holiday Season.

Kindest regards,

Brian Shelton  
General Manager
