January 7, 2009

Jason,

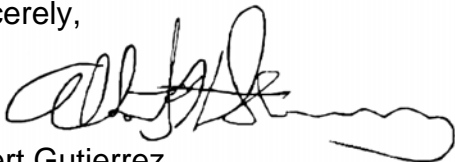

I wanted to thank you for introducing us to your Purigen98 nitrogen tire filling system. I wanted to tell you that we are extremely impressed with the entire Purigen program.

Your sales and technical personnel have been very knowledgeable and professional with my entire staff in assisting us with the rollout of the nitrogen program. We compared your program to others in the industry. Your entire marketing program far surpasses what everybody else is doing. Your technical and sales training was first rate.

So far our nitrogen program has been very well received by our customers. The profitability of this program has far exceeded even my expectations. The equipment has performed well. All of the information in the sales brochures and hand outs has been very polished and well thought out. This Purigen 98 program is truly a complete package from start to finish. First Class!

I fully recommend that any one who is considering a nitrogen program to look at this one. It stands head and shoulders above the rest. If any body is considering the viability of nitrogen, please call me at 972-489-1032 any time.

Sincerely,

Albert Gutierrez
General Manager
